Airplane ID Labels Are Required!

Since the fall of 2018, MAAC now requires you to mount an identification label on all models. MAAC policy allows the label to be mounted on the inside or outside of your aircraft. You can use clear Scotch tape to laminate it on your airplane. Print this sheet and cut out labels below. Please note that any member of the club's executive committee **will ground your plane for the day** if you cannot show that you have labeled your aircraft correctly.

Print these blank labels and write in the information manually.
