

## Airplane ID Labels Are Required!

MAAC and Transport Canada requires you to mount an identification label on all models. The label should be mounted on the outside of your aircraft where it is clearly visible. You can use clear Scotch tape to laminate it on your airplane. Print this sheet and cut out labels below. Please note that any member of the club's executive committee **will ground your plane for the day** if you cannot show that you have labeled your aircraft correctly.

***Print these blank labels and write in the information manually.***
